

DREAMS NIGHTMARES

DREAMS v NIGHTMARES

The thing about dreams is if you don't chase them, they will chase you. Don't allow yourself to be haunted by dreams turned nightmares. It's easy to dream, to get lost in your head imagining all the great things you could be and all the amazing feats you want to achieve. It's another story all together to actually put effort behind your visions with the sole intent of making them a reality.

In some respects we are all dreamers, and whether you are a realist or live in the clouds, we all have ideals about how we want to live our lives during our time on this plane. The key is to ensure that your dreams are all inspiring, that they haunt you in the most beautiful way so you can achieve them. Never let them turn against you.

This line is very thin so be careful not to stumble over it.
